Anton H. Heimdal

Goals

I want to earn experience and accumulate skills in the computer programming industry to work towards financial freedom to have a better live set up for me and my son. I am an easy going individual that is a born and bred team player, having spent most of my life in team sports. I have great passion for learning something new.

EDUCATION

University of Iceland, Reykjavik – *B.Sc. Computer Science*

August 2017 – February 2021 (Graduating)

University of Reykjavik, Reykjavik – *Students Degree*

August 2014 – December 2015

Finished a Students degree equivalent in 3 semesters

EXPERIENCE

Smakranar ehf, Reykjavik – *Crane Operator*

May 2018 – PRESENT

- I have licenses to operate small cranes and drive trucks with trailers.

Window Cleaning Contractor, Reykjavik – *Contractor Window Cleaner*

July 2019 – PRESENT

Malbikunarstodin Colas ehf, Hafnarfjordur – *Group leader*

July 2017 – August 2017

- Worked as a group supervisor
- As a truck driver as well as machine operator

Extra Courses taken outside of school

Got my truck and machine licence in a Driving Educational school called New Driving school (Nýji Ökuskólinn)

Languages

I speak Icelandic (Native language), English fluently, German (Basic), Danish (Basic) and Norwegian (Basic).

Computer Knowledge

I have good knowledge on operating systems like windows and Linux and I have good grasp on C#, Python, Java, Javascript, ATOM, Angular, Node.js JSON. All this knowledge has been accumulated through my school work at the University of Iceland.

In my spare time I have been learning on the Unity engine with the help of Udemmy courses.

I also have a good understanding on how Github works and how to use it in projects.

Personal Projects

I have personalized website heimdal.is where I have a list of my finished projects where a link to the source code is available and in some cases live version of the project.

Run Gun Renegade - Group project done by 4 members for the Course "COMPUTER GAME PROGRAMMING" - (TÖL308G - FALL 2018)

RVK - A group project with 4 members where we build a software for web and mobile use where a user could find several locations depending on his wishes within Reykjavik, Iceland. "SOFTWARE PROJECT 1" - (HBV501G - FALL 2019)
